H. J. HAMILTON,
Acting Assistant Surgeon.

Statistical reports of States and cities of the United States—Yearly and monthly.

CONNECTICUT—*Bridgeport.*—Month of June, 1902. Estimated population, 72,000. Total number of deaths, 76, including diphtheria, 1; enteric fever, 1; scarlet fever, 4, and 4 from phthisis pulmonalis.

MAINE—Biddeford.—Month of June, 1902. Estimated population, 17,000. Total number of deaths, 65, including enteric fever, 1, and 4 from phthisis pulmonalis.

MARYLAND—Baltimore.—Month of June, 1902. Estimated population, 525,000—white, 445,000; colored, 80,000. Total number of deaths, 874—white, 621; colored, 243—including diphtheria, 5; enteric fever, 13; measles, 6; scarlet fever, 4; whooping cough, 16; smallpox, 1, and 124 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended July 19, 1902, from 89 observers, indicate that diarrhea, bronchitis, phthisis pulmonalis, cholera infantum, and erysipelas were more prevalent and smallpox and diphtheria were less prevalent than in the preceding week. Meningitis was reported present at 7, diphtheria at 20, whooping cough at 33, enteric fever at 38, scarlet fever at 46, smallpox at 47, measles at 68, and phthisis pulmonalis at 230 places.

Mortality during June, 1902.—There were only 2,234 deaths returned to the department of State for the month of June. This number was 452 less than the number of deaths returned for May and 100 less than the number recorded for June, 1901. The death rate was 11.1 per 1,000 population. There were 395 deaths of infants under 1 year of age; 147 deaths of children aged 1 to 4 years, inclusive, and 651 deaths of persons aged 65 years and over. Important causes of deaths were as follows: Tuberculosis of lungs, 176; other forms of tuberculosis, 29; typhoid fever, 27; diphtheria and croup, 29; scarlet fever, 16; measles, 32; whooping cough, 34; pneumonia, 160; diarrhea and enteritis, under 2 years of age, 55; meningitis, 33; influenza, 11; cancer, 117; accidents and violence, 176. There were also 8 deaths from smallpox, distributed as follows: One each in the city of Escanaba, Delta County; Wheatland Township, Mecosta County; city of Menominee, Menominee County; Pioneer Township, Missaukee County; Vassar Village, Tuscola County, and 3 in the city of Detroit.

MINNESOTA—Minneapolis.—Month of June, 1902. Estimated population, 240,000. Total number of deaths, 186, including diphtheria, 6; enteric fever, 4; scarlet fever, 3; whooping cough, 1, and 24 from tuberculosis.

MISSOURI—St. Louis.—Month of June, 1902. Estimated population, 621,000—white, 582,000; colored, 39,000. Total number of deaths, 790—white, 673; colored, 117—including diphtheria, 4; enteric fever, 7; scarlet fever, 6; whooping cough, 17; smallpox, 3, and 139 from tuberculosis.

NEW JERSEY—Passaic.—Two weeks ended July 12, 1902. Census population, 27,777. Total number of deaths, 29, including 1 from diphtheria.

NEW YORK—Buffalo.—Month of June, 1902. Estimated population, 370,000. Total number of deaths, 364, including diphtheria, 10; enteric fever, 8; scarlet fever, 2, and 39 from phthisis pulmonalis.

Middletown.—Month of June, 1902. Estimated population, 15,000. Total number of deaths, 20. No deaths from contagious diseases.

OHIO—Cleveland.—Month of June, 1902. Estimated population, 400,000. Total number of deaths, 452, including diphtheria, 9; enteric fever, 13; measles, 3; scarlet fever, 1; whooping cough, 2; smallpox, 28, and 46 from tuberculosis.

WASHINGTON—Tacoma.—Month of June, 1902. Estimated population, 55,000. Total number of deaths, 37, including scarlet fever, 1, and 7 from tuberculosis.

FOREIGN AND INSULAR.

BRAZIL.

Reports from Bahia.

BAHIA, BRAZIL, *June 23, 1902.*

SIR: I beg leave to report that for the week ended June 21, 1902, there were reported in Bahia 100 deaths. The following were the chief causes of death: Aneurism, 3; arterio-sclerosis, 6; beriberi, 4; bronchitis, 3; cirrhosis of the liver, 1; diarrhea, 1; eclampsia, 1; enteritis, 1; enterocolitis, 1; malarial fevers, 4; gangrene, 1; gastritis, 6; hepatitis, 2; influenza, 2; meningitis, 2; Bright's disease, 2; nephritis, 2; still-born, 5; pneumonia, 1; syphilis, 1; tetanus, 2; tuberculosis, 8, and from other causes, 41.

Respectfully,

H. W. FURNISS,
United States Consul.

The SECRETARY OF THE TREASURY.

BAHIA, BRAZIL, *June 30, 1902.*

SIR: I beg leave to report that for the week ended June 28, 1902, there were reported in Bahia 117 deaths. The causes of death were as follows: Arterio-sclerosis, 4; beriberi, 10; bronchitis, 3; cirrhosis of the liver, 3; diarrhea, 1; malarial fevers, 9; gastritis, 3; hepatitis, 1; meningitis, 5; senile debility, 1; nephritis, 3; stillborn, 7; pneumonia, 2; syphilis, 2; tetanus, 2; tuberculosis, 10, and from other causes, 51.

Respectfully,

H. W. FURNISS,
United States Consul.

The SECRETARY OF THE TREASURY.

BRITISH HONDURAS.

Weekly report of conditions and transactions at Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *July 12, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 12, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 5. Causes of death: Pneumonia, 1; senility, 1; hepatic cirrhosis, 1; phthisis pulmonalis, 1, and natural causes, 1. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: July 10, steamship *Condor*; crew, 16; passengers from this port, none; passengers in

transit, none; baggage disinfected, none. July 11, steamship *Anselm*; crew, 42; passengers from this port, 3; passengers in transit, 17; baggage disinfected, 9 pieces.

Respectfully,

R. H. PETERS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CANADA.

Inspection of immigrants at Quebec for the week ended July 19, 1902.

QUEBEC, CANADA, July 21, 1902.

SIR: I have the honor to report that for the week ended July 19 there were inspected 366 immigrants; passed, 354; detained, 12. * * *

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon.

The SURGEON-GENERAL.

CHINA.

Report from Hongkong—Cholera and plague.

HONGKONG, CHINA, June 24, 1902.

SIR: I have the honor to transmit herewith the abstract of bills of health issued at this station during the week ended June 21, 1902. Thirteen vessels were inspected, 818 individuals were bathed, and 932 bundles of clothing and bedding were disinfected by steam. There were 7 rejections because of fever. The cholera situation remains about the same, 15 cases and 9 deaths having been reported during the week. Forty nine cases and 51 deaths from plague, 1 case of smallpox, and 2 cases of enteric fever were also reported by the sanitary board. The plague epidemic has not been severe thus far this year, and practically all the cases have been among the Chinese population. The total cases and deaths reported up to Saturday, June 21, are 329 and 322, respectively.

Respectfully,

JOHN W. KERR,
Assistant Surgeon.

The SURGEON-GENERAL.

Plague and cholera in Amoy and vicinity.

AMOY, CHINA, June 17, 1902.

SIR: I have the honor to inclose herewith a copy of a letter received to-day from Dr. J. A. Otte, Reformed Church of America Mission, concerning cholera and plague conditions in and around Amoy. This is the first year since 1895 that we have not had an epidemic of bubonic plague. Last year at this time we were having over 100 cases a day. For the past month we have had numerous cases of cholera, but it is gradually on the decrease.

Respectfully,

JOHN H. FESLER,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

[Inclosure.]

HOPE HOSPITAL,
BOARD OF FOREIGN MISSIONS, R. C. A.,
Amoy, China, June 5, 1902.

SIR: Plague has been prevalent in Amoy since 1895. I can find no reliable proof that it ever visited Amoy before this. Chinese history, however, records a very fatal epi-

demic some three hundred years ago. This is supposed to have been bubonic plague. Until this year (1902) no other epidemic has visited Amoy while plague existed. Of endemic cholera and smallpox there have been a few cases each year. In 1895 there were so many cases of cholera that at one time it was feared it would become epidemic. This year (1902) there have been so many cases of cholera that at one time it was feared it would become epidemic. This year (1902) there have been so many cases of cholera that for all practical purposes it may be said to be epidemic. On the other hand there are fewer cases of plague itself than there have been since it appeared in 1895. In Tongan and Choanchew, however, there are at present more cases of plague than in any previous year. In Choanchew both plague and cholera are epidemic, though there are fewer cases of both diseases than in ordinary epidemics.

It is impossible to get accurate statistics of the number of deaths that have occurred from plague in Amoy since its inception. Dr. Tan Thien-un, a very close observer, estimates the number of deaths from plague each year as over 6,000. He estimates the population of Amoy to be 300,000. This would give us 2 per cent per annum, which is, I think, too low an estimate. That Dr. Tan's estimate is not exaggerated is proved by absolutely accurate statistics which I have of the number of deaths from plague among our Christians and adherents in the Tongan district. Of 300 church members (living in dozens of villages) 63, or 21 per cent, have died from plague in seven years. In the month of May alone 20 out of the 300 Christians and adherents have this year died of plague. From these statistics we can get a fair idea of the number of deaths from plague in the Choanchew and Chiangchew prefectures during the seven years it has prevailed.

Respectfully,
J. H. FESLER,

United States Consul, Amoy, China.

J. A. OTTE, M. D.

Cholera in Shanghai, Changchow, Hangchow, Chinkiang, Kiangyin, Soochow, and Wusieh.

SHANGHAI, CHINA, *June 24, 1902.*

SIR: I have to confirm the following telegram of June 17:

SECRETARY OF STATE, *Washington, D. C.*: Cholera increasing here. About 30 foreign cases; unknown, but large number of natives dying daily.—GOODNOW.

During the week ended June 15 the municipal physician reported 150 deaths from diarrhea among natives. During the week ended June 27 he reports 181 deaths of natives from cholera, dysentery, and diarrhea.

I am unable to believe these figures to be correct. During the week ended June 15 the Ningpo Guild, of 50,000 members, buried 225 people, who were too poor to buy their own coffins, members of that guild. During the past week they have buried ———. The authorities of the guild say that these cases are all from cholera.

Hangchow, Soochow, Wusieh, Changchow, Kiangyin, and Chinkiang are suffering from cholera worse than is Shanghai, and yet, from the figures of the guild given above, I am forced to believe that from 200 to 300 Chinese are dying daily from cholera. The foreign physicians say that 2 to 4 foreigners are dying daily.

Respectfully,

JOHN GOODNOW,
United States Consul-General.

THE ASSISTANT SECRETARY OF STATE.

COSTA RICA.

Weekly report of conditions and transactions at Port Limon—Fruit port—Yellow fever.

PORT LIMON, COSTA RICA, *July 17, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 17, 1902:

Present officially estimated population, 4,000. Number of cases and

deaths from yellow fever during the week, 2 cases, no deaths; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 6. Prevailing diseases, yellow fever and malarial fever. Two cases of yellow fever, noted herein, were admitted to the United Fruit Company's hospital July 10, brought, respectively, from Lent Junction and Guasimo, 20 and 51 miles from this port, on the line of the Costa Rica Railway. General sanitary condition of this port and the surrounding country during the week, not good. Six deaths, noted herein, occurred in this port during the past week, all colored, 4 males and 2 females, due to, respectively, remittent fever, heart disease, dysentery, tetanus, and 2 from chronic malarial fever.

Bills of health were issued to the following vessels: July 10, steamship *Olympia*; crew, 37; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 11, steamship *Alabama*; crew, 19; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 12, steamship *Algiers*; crew, 32; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 15, steamship *Alleghany*; crew, 44; passengers from this port, 10; passengers in transit, 10; baggage disinfected, none. July 16, steamship *Holstein*; crew, 23; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

WM. H. CARSON,

Acting Assistant Surgeon.

The SURGEON-GENERAL.

CUBA.

Report from Havana.

HAVANA, CUBA, July 23, 1902.

Reports from Nuevitas, Gibara, Puerto Padre, and Banes—Further concerning death from yellow fever at Gibara.

NUEVITAS, CUBA, July 17, 1902.

SIR: Through Surg. A. H. Glennan, Havana, Cuba, I have the honor to submit the following report of this station for the week ended July 12, 1902:

During this period there was 1 bill of health issued. No deaths are reported for the week.

Gibara, Puerto Padre, and Banes.—Reports delayed.

On July 15 I cabled you as follows: "One death, yellow fever, Gibara." This case, Canary Islander, eight months in Cuba, was admitted to the municipal hospital at Gibara on the 9th instant and

died on the 10th. During the four days previous to this the man was sick in a sailors' boarding house (Fonda de Marineros) and was treated by a local physician, who, however, did not report the case as suspicious. Dr. Gomez, the Cuban quarantine officer at Gibara, informs me that all precautions have been taken to prevent the spread of the disease.

Respectfully,

E. F. McCONNELL,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

NUEVITAS, CUBA, *July 22, 1902.*

SIR: Through Surg. A. H. Glennan, I have the honor to make the following report of the transactions of this station for the week ended July 19, 1902: During this period bills of health were issued to the steamship *Olinda*, bound for New York, the steamship *Comino*, bound for a port in the United States, via Cuban ports, the steamship *Humberto Rodriguez* and 2 barges bound for Tampa, Fla. The steamship *Rodriguez* and her barges were disinfected previous to sailing. Twenty-one health certificates were issued, 35 pieces of baggage inspected and passed, 105 pieces of baggage disinfected, and 201 passengers and crew examined.

The mortuary reports are as follows:

Nuevitas.—Pneumonia, 1; athrepsia, 1; angina pectoris, 1.

Puerto Padre.—None.

Gibara.—Enterocolitis, 1; infantile tetanus, 1.

Banes.—Infantile tetanus, 1; organic lesion of the heart, 1.

Baracoa.—Gastro-enteritis, 1; cirrhosis of the liver, 1; pernicious malarial fever, 1; acute enteritis, 1; malarial fever, 2.

No quarantinable disease has been reported in this district.

Respectfully,

E. F. McCONNELL,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

ENGLAND.

Report from Liverpool.

LIVERPOOL, ENGLAND, *July 15, 1902.*

SIR: I have the honor to state that for the week ended July 12, 1902, there were reported to the local authorities the following cases: Smallpox, 3; enteric fever, 20; scarlet fever, 70; diphtheria, 13; measles, 12. For the same period there were reported from Birkenhead the following cases: Scarlet fever, 2; enteric fever, 4; measles, 19.

Respectfully,

CARROLL FOX,
Assistant Surgeon.

The SURGEON-GENERAL.

Report from London.

LONDON, ENGLAND, *July 18, 1902.*

SIR: I have the honor to report that for the week ended July 12, 1902, there were inspected and given bills of health at this port 4 vessels and 34 members of crew and cattlemen were vaccinated. In the 76 great towns of England and Wales there were 18 deaths from smallpox, 13 of which occurred in London, same as the previous week. During the week ended July 12, 1902, there were 51 cases of smallpox admitted

to the hospitals and 579 cases under treatment at the end of the week. Admissions for three preceding weeks were 107, 129, and 58. For the same period (July 12, 1902), there were 2,352 cases of scarlet fever, 954 of diphtheria, and 236 of enteric fever under treatment in the local hospitals. Abstract of bills of health inclosed.

Respectfully,

JOHN McMULLEN,

Passed Assistant Surgeon.

The SURGEON-GENERAL.

GERMANY.

Report from Berlin—More concerning plague on the steamship City of Perth.

BERLIN, GERMANY, July 12, 1902.

SIR: I have the honor to transmit herewith the latest information obtained from the imperial health office (Kaiserliches Gesundheitsamt), at Berlin, regarding plague and cholera:

Plague.

GREAT BRITAIN.—The steamship *City of Perth*, which lost 2 of her crew at Dunkirk by plague on June 11, and on June 13 had a third plague patient on board, arrived on June 18 at the mouth of the Thames with 1 plague patient. The ship was disinfected and the patient was taken to the hospital at Denton, where he died the next day. His disease was demonstrated by bacteriological examination to be plague. The steamship had left Calcutta on May 2, Colombo on May 10, Suez on May 26, Port Said on May 27, and Malta on May 31. The first case of sickness began on June 5, the second on June 7.

TURKEY.—According to a report dated June 30, a case of plague has occurred in Stambul and 1 in Galata.

EGYPT.—Between June 20 and June 26, 6 plague cases and 5 deaths were registered, namely, 4 cases, 3 deaths, in Alexandria; 1 case, 1 death, in Tukh, and 1 case, 1 death, in the district of Mellawi.

Plague and cholera.

BRITISH INDIA.—In Calcutta, during the week ended May 31, 132 persons died of plague and 72 of cholera.

JAPAN.—According to a telegraphic report dated July 1, several cases of cholera have been registered in Tokio.

Respectfully,

FRANK H. MASON,

United States Consul-General.

The SURGEON-GENERAL.

GUATEMALA.

Weekly report of conditions and transactions at Livingston—Fruit port.

LIVINGSTON, GUATEMALA, July 15, 1902.

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 15, 1902:

Present officially estimated population, 3,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 1. Prevailing disease, malarial fever. General sani-

tary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: July 15, steamship *Managua*; crew, 17; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

GUY A. DARCANTEL,
For A. J. SMITH,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Reports from Puerto Barrios—Fruit port.

PUERTO BARRIOS, GUATEMALA, July 7, 1902.

SIR: For the week ended July 5, the health and sanitary condition of Puerto Barrios and the surrounding country have been good. The following vessels have cleared from this port: July 1, American steamship *Breakwater*, for New Orleans, with 8 passengers and 8 pieces of disinfected baggage. July 2, Norwegian steamship *Managua*, for Mobile, with cargo of fruit.

Respectfully,

D. P. ALBERS,
*Resident Medical Inspector for the
Louisiana State Board of Health, Puerto Barrios.*

The SURGEON-GENERAL.

PUERTO BARRIOS, GUATEMALA, July 14, 1902.

SIR: The health and sanitary condition of this port and the surrounding country during the week ended July 12, have been good. Two deaths have occurred during the week—Brights disease, 1; dysentery, 1. The following vessels have cleared from this port: July 8, British steamship *Anselm*, for New Orleans, with 9 passengers and 12 pieces of disinfected baggage. July 8, Norwegian steamship *Condor*, for New Orleans, with cargo of coffee and fruit.

Respectfully,

D. P. ALBERS,
*Resident Medical Inspector for the
Louisiana State Board of Health, Puerto Barrios.*

The SURGEON-GENERAL.

 Chief Quarantine Officer, Hawaiian Islands.*

The SURGEON-GENERAL.

ITALY.

Report from Naples.

NAPLES, ITALY, July 7, 1902.

SIR: I have the honor to report that for the week ended July 5, 1902, the following steamships were inspected at Naples:

June 29, the steamship *Palatia*, of the Hamburg-American Line, bound with passengers and cargo for New York. There were inspected and passed 708 steerage passengers and 193 pieces of large baggage; 850 pieces of baggage were disinfected by steam. The rejection of 23 steerage passengers was advised.

July 2, the steamship *Citta di Milano*, of the Veloce Line, bound with passengers and cargo for New York. There were inspected and passed 338 steerage passengers and 135 pieces of large baggage; 750 pieces of baggage were disinfected by steam. The rejection of 15 steerage passengers was advised.

July 3, the steamship *Lahn*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 545 steerage passengers and 125 pieces of large baggage; 500 pieces of baggage were disinfected by steam. The rejection of 19 steerage passengers was advised.

July 5, the steamship *Spartan Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 556 steerage passengers and 56 pieces of large baggage; 750 pieces of baggage were disinfected by steam. The rejection of 28 steerage pas-

sengers was advised. Steamship *Gallia*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 391 steerage passengers and 148 pieces of large baggage; 500 pieces of baggage were disinfected by steam. The rejection of 8 steerage passengers was advised.

Smallpox at Naples.

During the week ended July 5, 1902, there were officially reported at Naples 3 cases of smallpox with no deaths.

Respectfully,

J. M. EAGER,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

JAPAN.

Cholera reported at Nagasaki—Plague at Canton.

DEPARTMENT OF STATE,
Washington, D. C., July 21, 1902.

SIR: I have the honor to advise you for the information of the Public Health and Marine-Hospital Service, that this Department is in receipt of 2 telegrams, one under date of July 19, from the consul of the United States at Nagasaki, Japan, which reads, "Cholera," and the other dated July 21, 1902, from the consul at Canton, China, reading, "Influenza almost epidemic, plague sporadic, Canton."

Respectfully,

DAVID J. HILL,
Acting Secretary of State.

The SECRETARY OF THE TREASURY.

Cholera at Mogi.

DEPARTMENT OF STATE,
Washington, D. C., July 23, 1902.

SIR: I have the honor to advise you for the information of the Public Health and Marine-Hospital Service that the Department is in receipt of a telegram from the consul of the United States at Nagasaki, Japan, dated the 22d instant, reading as follows: "Cholera, Mogi." * * *

Respectfully,

DAVID J. HILL,
Acting Secretary of State.

The SECRETARY OF THE TREASURY.

Report from Yokohama—Cholera in Saga Ken.

YOKOHAMA, JAPAN, *June 23, 1902.*

SIR: I have the honor to transmit herewith abstract of bills of health issued at this office during the week ended June 21, 1902. Bills of health were issued to 6 vessels with a personnel of 716 passengers and 445 crew; 461 steerage passengers were bathed and their baggage was disinfected by formaldehyd. Yokohama remains free from quarantinable disease.

The cholera situation in Saga Ken shows no tendency to improve; on the contrary, the disease seems to be spreading. From the beginning of the epidemic (about June 1) to June 20, 41 cases have been reported with 15 deaths. It is deemed probable that the infection was introduced from Shanghai. The great majority of Japanese emigrant-bound for Hawaii and the United States take ship at Yokohama; a

large percentage of these come from the island of Kyushu, fortunately only a small number, as a rule, from the infected prefecture.

It is understood that the Japanese authorities are acting energetically to prevent the progress of the epidemic.

A case of cholera, terminating fatally on the 15th instant, is reported from Iki Gori, Nagasaki Ken.

Respectfully,

DUNLOP MOORE,
Assistant Surgeon.

The SURGEON-GENERAL,

Report from Yokohama—Cholera in Saga Ken, Nagasaki Ken, Tokyo Fu, and Formosa.

YOKOHAMA, JAPAN, *June 28, 1902.*

SIR: I have the honor to transmit herewith abstract of bills of health issued at this office during the week ended June 28, 1902. There were inspected 6 vessels with a personnel of 407 crew and 834 passengers; 554 steerage passengers were bathed and 712 pieces of steerage baggage were disinfected by formaldehyd. The port of Yokohama remains free from quarantinable disease.

Elsewhere in the Empire of Japan the cholera situation is becoming more threatening. Reports received up to June 27 show for Saga Ken, where the disease first appeared, from outbreak to date, 47 cases, with 26 deaths; Nagasaki Ken, 3 cases, 2 deaths; the island of Formosa, 11 cases, 5 deaths; Tokyo Fu, 5 cases, 3 deaths.

The presence of cholera in Tokyo has an important bearing on the work of the Service at this port, only 18 miles distant by rail. It is noted that the diagnosis has been confirmed bacteriologically and that cases have occurred in widely separated districts of the city.

Passengers for the United States who may have been exposed to infection are detained under observation here for five days; invoices are being carefully scrutinized, although it is believed that at present the danger of the spread of the contagion through freight is practically nil. Correspondence with Acting Assistant Surgeon Fowler at Kobe shows that he is enforcing restrictive measures similar to those existing here. I take pleasure in acknowledging valuable information received from United States Consul Harris at Nagasaki relative to the cholera situation in his district. It should be mentioned that the cases of cholera reported from Nagasaki Ken possess very limited significance for quarantine officers abroad. Two of the cases, it seems, occurred on the small island of Iki, against which the rest of Japan maintains quarantine, and 1 case on a detained vessel.

Rather numerous cases of plague are from time to time reported from Taipet and elsewhere in Formosa, but no detailed report has recently been received.

Respectfully,

DUNLOP MOORE,
Assistant Surgeon.

The SURGEON-GENERAL.

NICARAGUA.

Weekly report of conditions and transactions at Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, *July 13, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 12, 1902:

Present officially estimated population, 4,000. Number of cases and

deaths from yellow fever during the week, none ; number of cases and deaths from smallpox during the week, none ; number of cases and deaths from typhus fever during the week, none ; number of cases and deaths from cholera during the week, none ; number of cases and deaths from plague during the week, none ; number of deaths from other causes during the week. 4. Prevailing disease, malarial fever. Two of the above-recorded deaths were in soldiers from wounds received in a so-called revolution. The fight took place across the lagoon, some 6 miles from Bluefields, but the wounded and dead were brought here for treatment or interment. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: July 12, steamship *Nicaragua* ; crew, 20 ; passengers from this port, none ; passengers in transit, none ; baggage disinfected, none.

Respectfully,

D. W. GOODMAN,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

PORTO RICO.

Reports from Ponce.

PONCE, P. R., *July 14, 1902.*

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract bills of health reports for the week ended July 12, 1902. During the week, 3 vessels were inspected and passed and 3 bills of health issued to outgoing vessels. The sanitary condition of the city is about the same.

Respectfully,

W. W. KING,
Assistant Surgeon.

The SURGEON-GENERAL.

PONCE, P. R., *June 25, 1902.*

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended June 21, 1902.

During the week, 5 vessels were inspected, of which 3 were held in quarantine, transacting their business under guard and sailing in a few hours ; 5 bills of health were issued.

The vessels in quarantine were the Spanish steamship *Montevideo*, on the 17th, from Havana, via Port Limon, Colon, Sabanilla, Puerto Cabello, and La Guayra. On the same day, the French steamship *St. Domingue*, from Port au Prince, via Jeremie, Les Cayes, Jacmel, Santo Domingo, and Mayaguez. Disinfected 1 sack of mail and 5 pieces of baggage. On the 18th, the Cuban steamship *Julia*, from Havana via Nuevitas, Gibara, Baracoa, Santiago, Santo Domingo, and Macoris. Disinfected 1 sack of mail and 83 pieces of baggage from the Dominican ports. Baggage from Cuba was inspected and passed, being disinfected at port of departure.

No more smallpox has been reported in this vicinity.

Respectfully,

W. W. KING,
Assistant Surgeon.

The SURGEON-GENERAL.

Summary of the smallpox in Porto Rico.

SAN JUAN, P. R., July 14, 1902.

SIR: I have the honor to submit herewith the following report upon the subepidemic of smallpox and varioloid which was existant in the island of Porto Rico from February until about the middle of June, 1902: Of the 920 cases which occurred, there was but 1 death. Cases occurred at the following localities: San Juan, 110; Arecibo, 381; Camuy, 121; Isabela, 9; Utuado, 79; Ciales, 6; Corozal, 2; Ponce, 128; Lares, 3; Caguas, 71; Hatillo, 5; Fajardo, 1; Humacao, 1; Bayamon, 3. The death mentioned above occurred at Arecibo and was an imported case.

Respectfully,

H. S. MATHEWSON,

*Passed Assistant Surgeon,**Chief Quarantine Officer for Porto Rico.*

The SURGEON-GENERAL.

Inspection of immigrants at Ponce and subports for the week ended June 21, 1902.

PONCE, P. R., June 23, 1902.

SIR: Through the chief quarantine officer for Porto Rico, I submit herewith report of alien steerage passengers arriving at this port during the week ended June 21, 1902:

Date.	Vessel.	Where from.	No. of immigrants.
June 17	Spanish steamship Montevideo.....	Havana, Port Limon, Colon, Sabanilla, Porto Cabello, La Guayra.	1
Do.....	French steamship St. Domingue.....	Port au Prince and Santo Domingo..	9
June 18	Cuban steamship Julia.....	Havana, Nuevitas, Gibara, Baracoa, Santiago de Cuba, Macoris, Santo Domingo.	8
	Total		18

Respectfully,

W. W. KING,

Assistant Surgeon.

The SURGEON-GENERAL.

SAN JUAN, P. R., June 23, 1902.

SIR: I submit herewith report of alien steerage passengers arriving during the week ended June 21, 1902, at the subports of Porto Rico.

Mayaguez.—June 16, French steamship *St. Domingue*, from Haitian ports and Santo Domingo, with 8 immigrants. June 18, Cuban steamship *Julia*, from Cuban and Dominican ports, with 3 immigrants. Total, 11. Other subports, no transactions.

Respectfully,

H. S. MATHEWSON,

*Passed Assistant Surgeon,**Chief Quarantine Officer for Porto Rico.*

The SURGEON-GENERAL.

Inspection of immigrants at Ponce for the week ended July 12, 1902.

PONCE, P. R., July 14, 1902.

SIR: Through the chief quarantine office for Porto Rico, I submit herewith report of alien steerage passengers arriving at this port during the week ended July 12, 1902: July 9, American steamship *Zulia*, from Maracaibo and Curaçao, with 9 immigrants.

Respectfully,

W. W. KING,

Assistant Surgeon.

The SURGEON-GENERAL.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—*Sierra Leone*.—Two weeks ended June 20, 1902. Estimated population, 40,000. Total number of deaths, 28. No contagious diseases.

AUSTRALIA—*New South Wales—New Castle*.—Month of April, 1902. Estimated population, 70,000. Total number of deaths, 76, including diphtheria, 1; enteric fever, 1, and 1 from whooping cough.

Month of May, 1902. Total number of deaths, 73, including diphtheria, 4; enteric fever, 2, and 4 from measles.

Queensland—Brisbane.—Month of January, 1902. Estimated population, 119,907. Total number of deaths, 92, including diphtheria, 2; enteric fever, 3, and 2 from whooping cough.

Month of February, 1902. Total number of deaths, 63, including enteric fever, 3; whooping cough, 2, and 3 from plague.

Month of March, 1902. Total number of deaths, 76, including diphtheria, 1; enteric fever, 1, and 5 from plague.

BAHAMAS—*Dunmore Town*.—Two weeks ended July 18, 1902. Estimated population, 1,232. One death. No contagious diseases.

Governors Harbor.—Three weeks ended July 19, 1902. Estimated population, 1,500. No deaths and no contagious diseases.

Green Turtle Cay—Abaco.—Two weeks ended July 16, 1902. Estimated population, 3,314. No deaths and no contagious diseases.

Nassau.—Two weeks ended July 21, 1902. Estimated population, 12,535. Number of deaths not reported. No contagious diseases reported.

CHINA—*Amoy*.—Two weeks ended June 14, 1902. Estimated population, 250,000. Number of deaths not reported. Cholera present.

FRANCE—*Rouen*.—Month of May, 1902. Estimated population, 116,316. Total number of deaths, 251, including diphtheria, 2; enteric fever, 5; whooping cough, 1; smallpox, 1, and 58 from tuberculosis.

St. Etienne.—Two weeks ended June 30, 1902. Estimated population, 146,559. Total number of deaths, 117, including diphtheria, 2; measles, 2; whooping cough, 2, and 18 from tuberculosis.

GERMANY—*Weimar*.—Month of June, 1902. Estimated population, 29,116. Total number of deaths, 26, including 1 from diphtheria.

GIBRALTAR.—Two weeks ended July 6, 1902. Estimated population, 27,460. Total number of deaths, 19, including 1 from measles.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended July 5, 1902, correspond to an annual rate of 15.4 per 1,000 of the aggregate population, which is estimated at 14,862,456.

London.—One thousand three hundred and twenty-five deaths were registered during the week, including measles, 35; scarlet fever, 13; diphtheria, 16; whooping cough, 47; enteric fever, 15; smallpox, 13, and diarrhea and dysentery, 22. The deaths from all causes correspond

to an annual rate of 15.1 per 1,000. In Greater London 1,777 deaths were registered. In the "outer ring" the deaths included 5 from diphtheria, 6 from measles, 1 from scarlet fever, 5 from smallpox, and 4 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 5, 1902, in the 21 principal town districts of Ireland was 21.0 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Newry, viz, 4.1, and the highest in Wexford, viz, 46.7 per 1,000. In Dublin and suburbs 149 deaths were registered, including enteric fever, 2; measles, 6; scarlet fever, 1, and 30 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended July 5, 1902, correspond to an annual rate of 16.3 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Perth, viz, 7.8, and the highest in Dundee, viz, 18.0 per 1,000. The aggregate number of deaths registered from all causes was 528, including diphtheria, 5; measles, 13; scarlet fever, 5, and 16 from whooping cough.

ITALY—Genoa.—Month of May, 1902. Estimated population, 221,774. Total number of deaths, 362, including diphtheria, 12; enteric fever, 2; measles, 15; scarlet fever, 9, and 50 from tuberculosis.

Milan.—Month of May, 1902. Estimated population, 501,643. Total number of deaths, 873, including diphtheria, 9; enteric fever, 9; measles, 12, smallpox 2, and 56 from tuberculosis.

JAMAICA—Port Antonio.—Week ended June 21, 1902. Estimated population not reported. Two deaths. No contagious diseases.

Week ended July 12, 1902. No deaths and no contagious diseases.

JAPAN—Nagasaki.—Ten days ended June 30, 1902. Estimated population, 131,700. Number of deaths not reported. No deaths from contagious diseases reported.

SPAIN—Cadiz.—Month of June, 1902. Estimated population, 70,177. Total number of deaths, 197, including enteric fever, 4; measles, 1, and 16 from tuberculosis.

WEST INDIES—St. Thomas.—Three months ended June 30, 1902. Estimated population, 11,012. Total number of deaths, 100, including 5 from phthisis pulmonalis.

Two weeks ended July 11, 1902. Total number of deaths, 12. No deaths from contagious diseases.

Cholera, yellow fever, plague, and smallpox, June 28, 1902, to August 1, 1902.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and other sources.]

[For reports received from December 28, 1901, to June 27, 1902, see PUBLIC HEALTH REPORTS for June 27, 1902.]
